MD TAUQEEB

DATA ANALYST | BUSINESS ANALYST

+91 6207718873 | mdtauqeeb22@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Science undergraduate with a foundation in data analysis, statistical methods, predictive modeling, and machine learning. Hands-on experience building Python-based analytical workflows and interactive Streamlit dashboards. Skilled in using Python, SQL, and data visualization tools to explore datasets, identify patterns, and communicate findings.

TECHNICAL SKILLS

Programming & Query Languages: Python (NumPy, Pandas, SciPy, Scikit-learn), R, SQL (PostgreSQL, MySQL)

Data Analysis & Statistics: Exploratory Data Analysis (EDA), data preprocessing, feature engineering, hypothesis testing, A/B testing, probability, linear algebra

Machine Learning: Regression, classification, clustering (K-Means), decision trees, random forest, XGBoost

Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Docker (basic)

PROJECTS

Sales Performance Analytics Dashboard

Technologies: Python, Pandas, Matplotlib, Streamlit

- Analyzed 1,200 sales records across regions, product categories, sales channels, and products to identify business trends.
- Built an interactive Streamlit dashboard with KPI cards, dynamic filters, and sales performance visualizations.
- Used Pandas for data cleaning, aggregation, and exploratory sales analysis; generated monthly trend and Top 10 Products charts.
- Enabled CSV downloads of filtered data and analytical results.

Live Demo: Sales Performance Analytics Dashboard | GitHub Repository: Sales-Performance-Analytics

House Price Prediction

Technologies: Python, Pandas, NumPy, Scikit-learn, Streamlit

- Developed a machine learning web application to estimate house prices from property-related input features.
- Created an interactive Streamlit interface for users to enter property details and view predicted prices.
- Prepared and analyzed data for model development and made the application accessible through an online deployment.

Live Demo: House Price Prediction | GitHub Repository: House_Price_Prediction

EXPERIENCE & TRAINING

Data Science Professional Trainee | Euphoria GenX

2025–2026

- Assisted with data extraction, cleansing, and feature engineering across tabular datasets reportedly exceeding 200,000 rows.
- Supported data collection, organization, and documentation activities.
- Collaborated with team members to complete assigned tasks and gained exposure to professional workflows and workplace practices.

EDUCATION

B.Sc. in Data Science | NIMAS George Group of Colleges

2023–2027 | Currently pursuing

CGPA: 8.2 through the 6th semester

Relevant Coursework: Machine Learning, Applied Statistics, Database Management Systems, Data Structures & Algorithms, Big Data Analytics, Linear Optimization.

CERTIFICATIONS & JOB SIMULATIONS

- Tata — GenAI Powered Data Analytics Job Simulation, Forage (September 2026)
- British Airways — Data Science Job Simulation, Forage (September 2026)
